Lumen Inks

Color reference · CIE L*a*b* and calibrated color

CIE L*a*b* (D50 white point), chroma 45, hue every 45°, and the neutral axis

CalRGB (sRGB primaries, gamma 2.2) over DeviceRGB, and CalGray (gamma 2.2) over DeviceGray

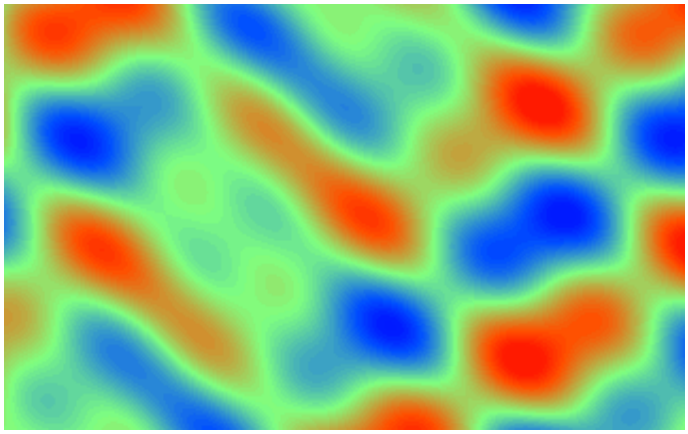

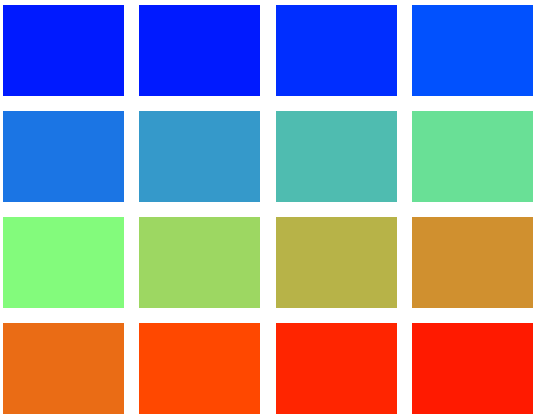

Lumen Inks is invented for the Broadside sample documents. Values are for a viewer's color management, not for proofing.

Lumen Inks

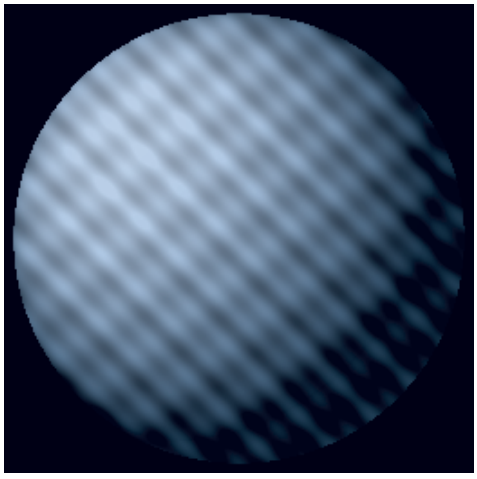

Color reference · Indexed, DeviceN and overprint

Indexed: a 64-entry RGB palette, 8 bits per index

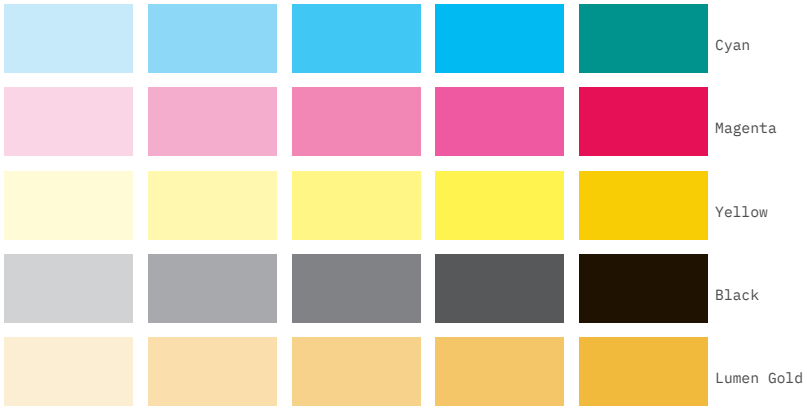

DeviceN duotone: Black and Lumen Blue

DeviceN, five inks: tints of each ink, then mixes with the spot

Overprint (OPM 1): magenta printed over cyan, without and with overprint

Left: knocks out (the magenta replaces the cyan). Right: overprints (an overprint preview shows blue).
