SPRING 2027 CATALOGUE

Photographs from fifty years of spaceflight, printed on archival cotton paper and framed by hand.

IN THIS CATALOGUE

01 Earthrise 3

02 Tranquility Base 4

03 Untethered 5

04 Climb Out 6

05 First Light 7

06 Southern Lights 8

07 Hadley Rille 9

08 Small prints 10

09 Frames and ordering 11

DEAR STARGAZER,

We started Orbital Prints in a converted bakery with one large-format printer and a box of library books about the space programme. Ten years later we still print every order ourselves, one sheet at a time, and we still check each print under a daylight lamp before it is wrapped.

This spring we have added three photographs that customers asked for again and again, a new walnut frame, and a range of small prints for desks, shelves and narrow hallways. Every image in the catalogue was taken by astronauts or NASA staff and belongs to everyone: what you pay for is the paper, the ink, the frame and our time.

Prices include printing, a cotton-rag mount and delivery within the EU. Frames are optional and listed on the last page.

Ines and Tomas, founders

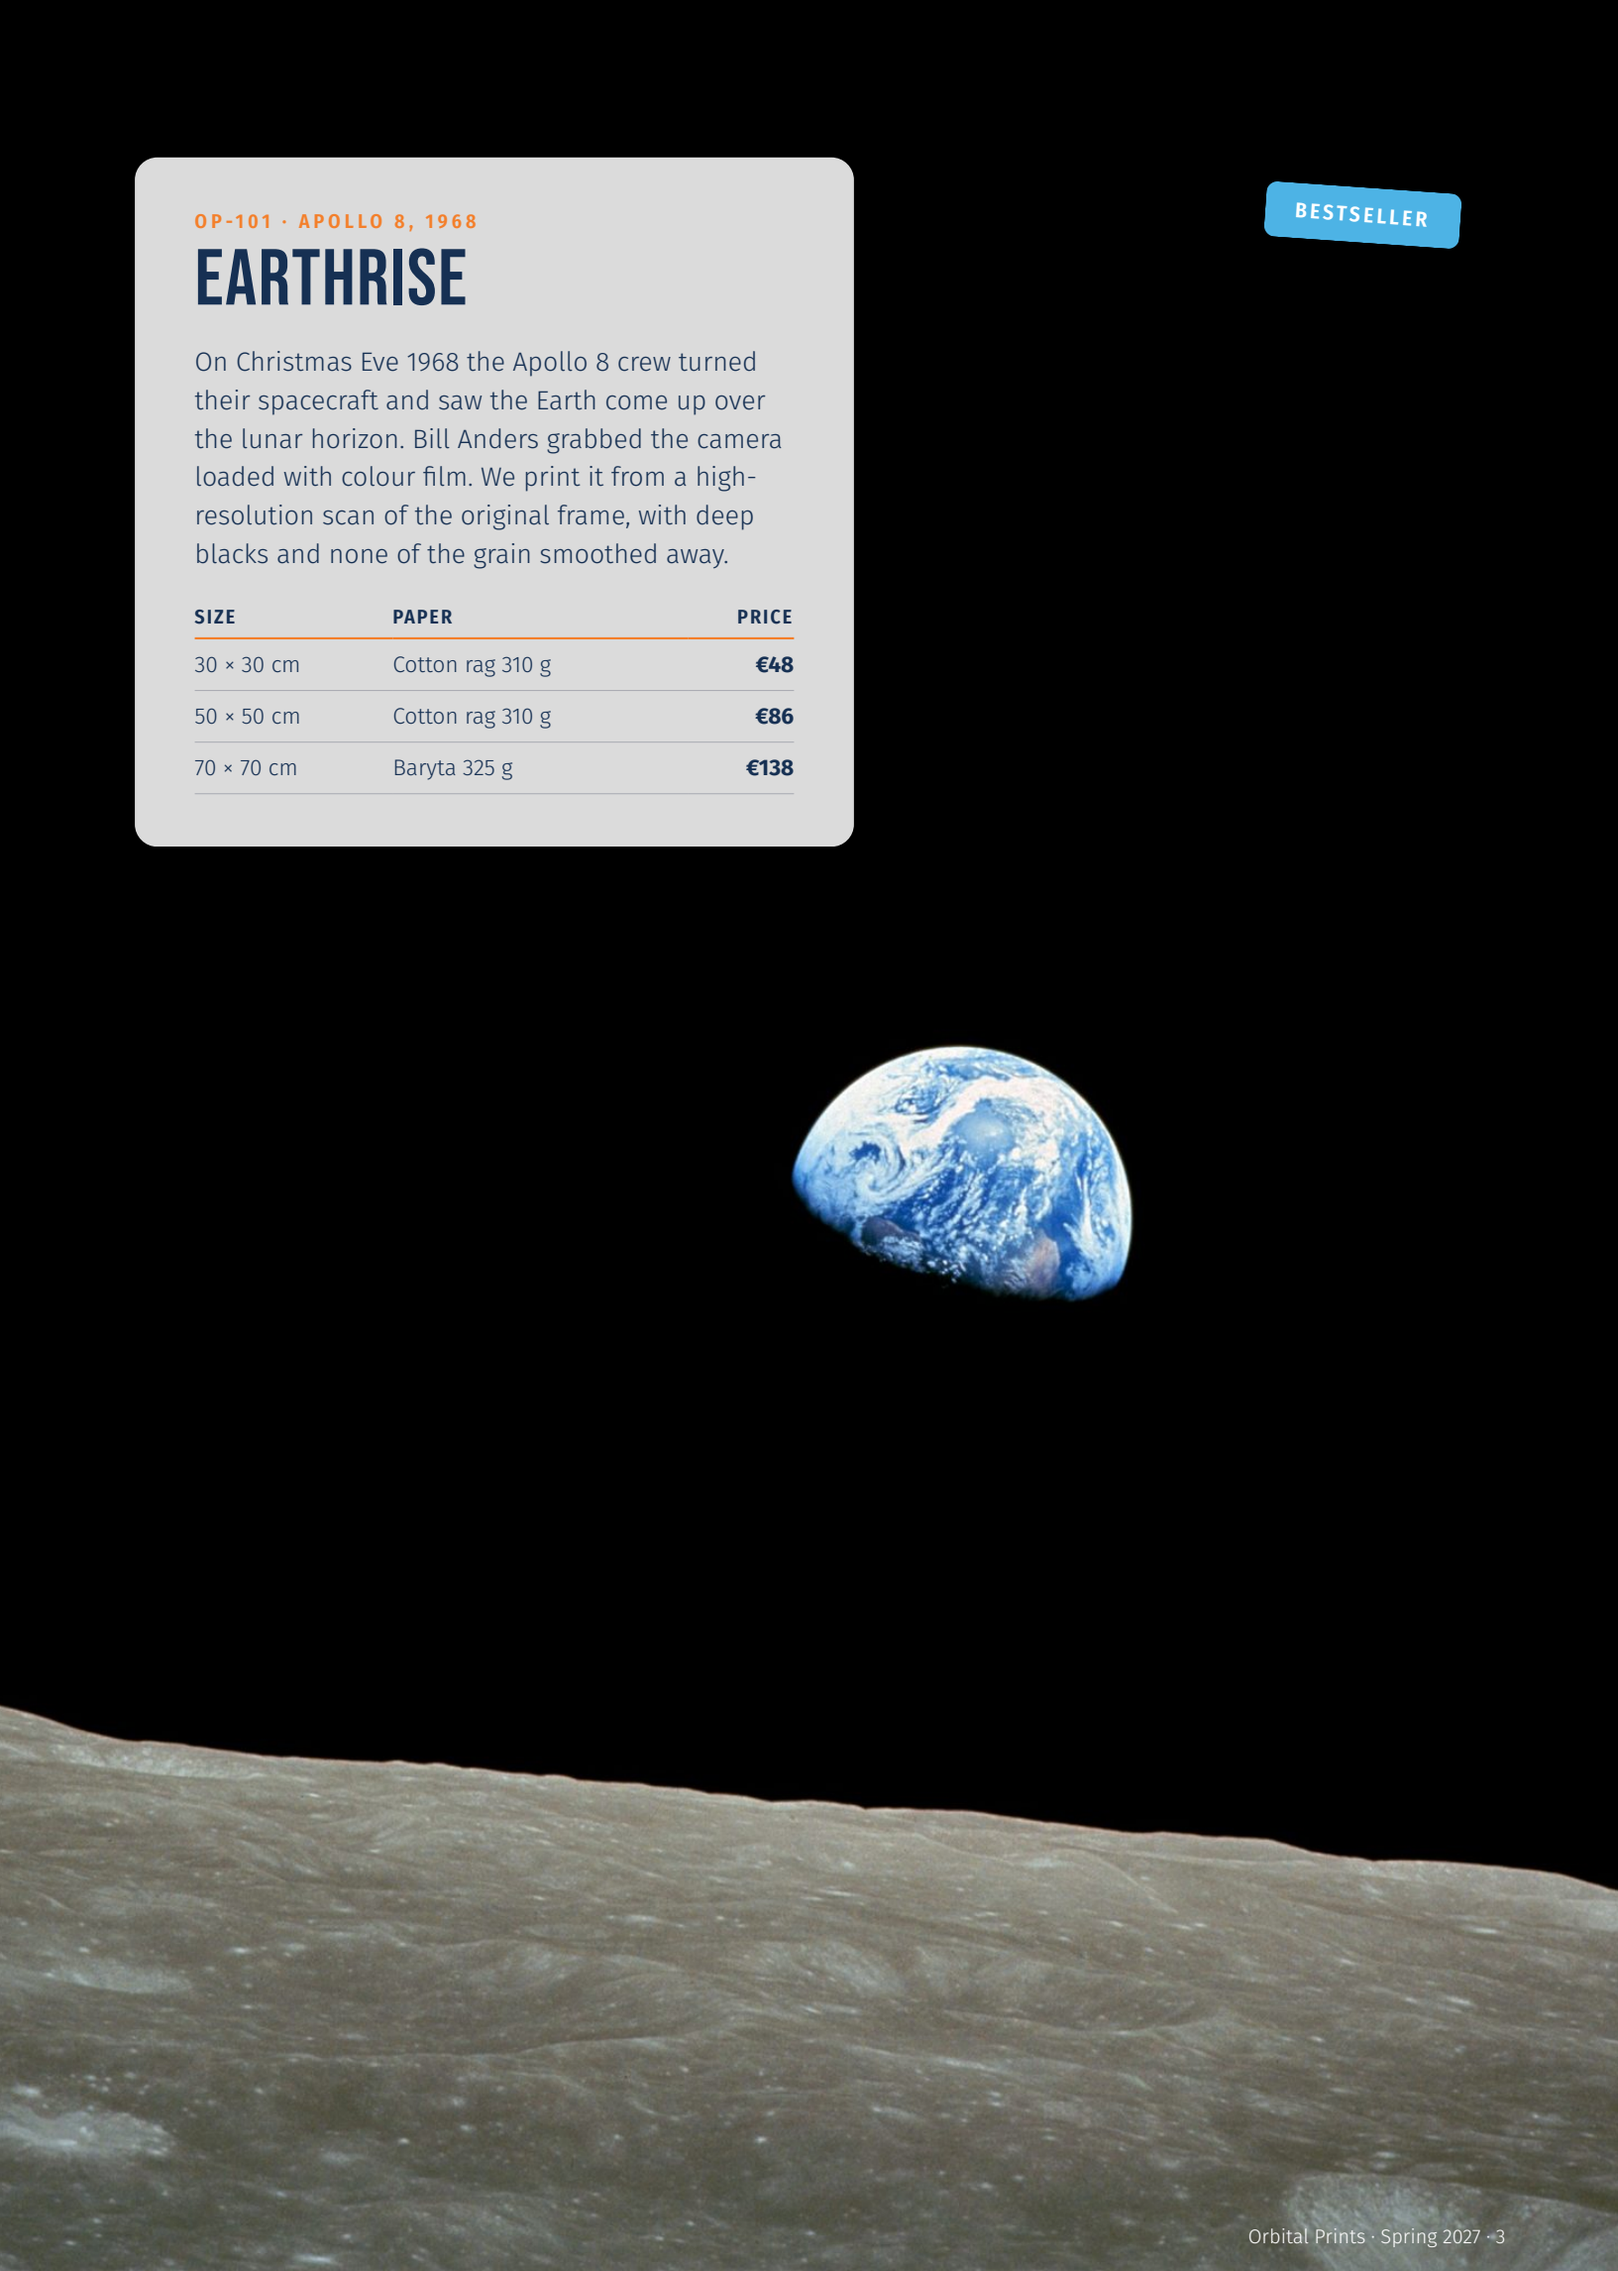

OP-101 · APOLLO 8, 1968

EARTHRISE

BESTSELLER

On Christmas Eve 1968 the Apollo 8 crew turned their spacecraft and saw the Earth come up over the lunar horizon. Bill Anders grabbed the camera loaded with colour film. We print it from a high-resolution scan of the original frame, with deep blacks and none of the grain smoothed away.

SIZE	PAPER	PRICE
30 × 30 cm	Cotton rag 310 g	**€48**
50 × 50 cm	Cotton rag 310 g	**€86**
70 × 70 cm	Baryta 325 g	**€138**

OP-102 · APOLLO 11, 1969

TRANQUILITY BASE

Neil Armstrong took most of the photographs on the first Moon walk, so there are very few pictures of him. Look closely at the visor: he is there, reflected next to the lunar module, holding the camera that made this image.

SIZE	FINISH	PRICE
40 × 40 cm	Matte	**€64**
60 × 60 cm	Matte	**€104**
90 × 90 cm	Satin, on aluminium	**€249**

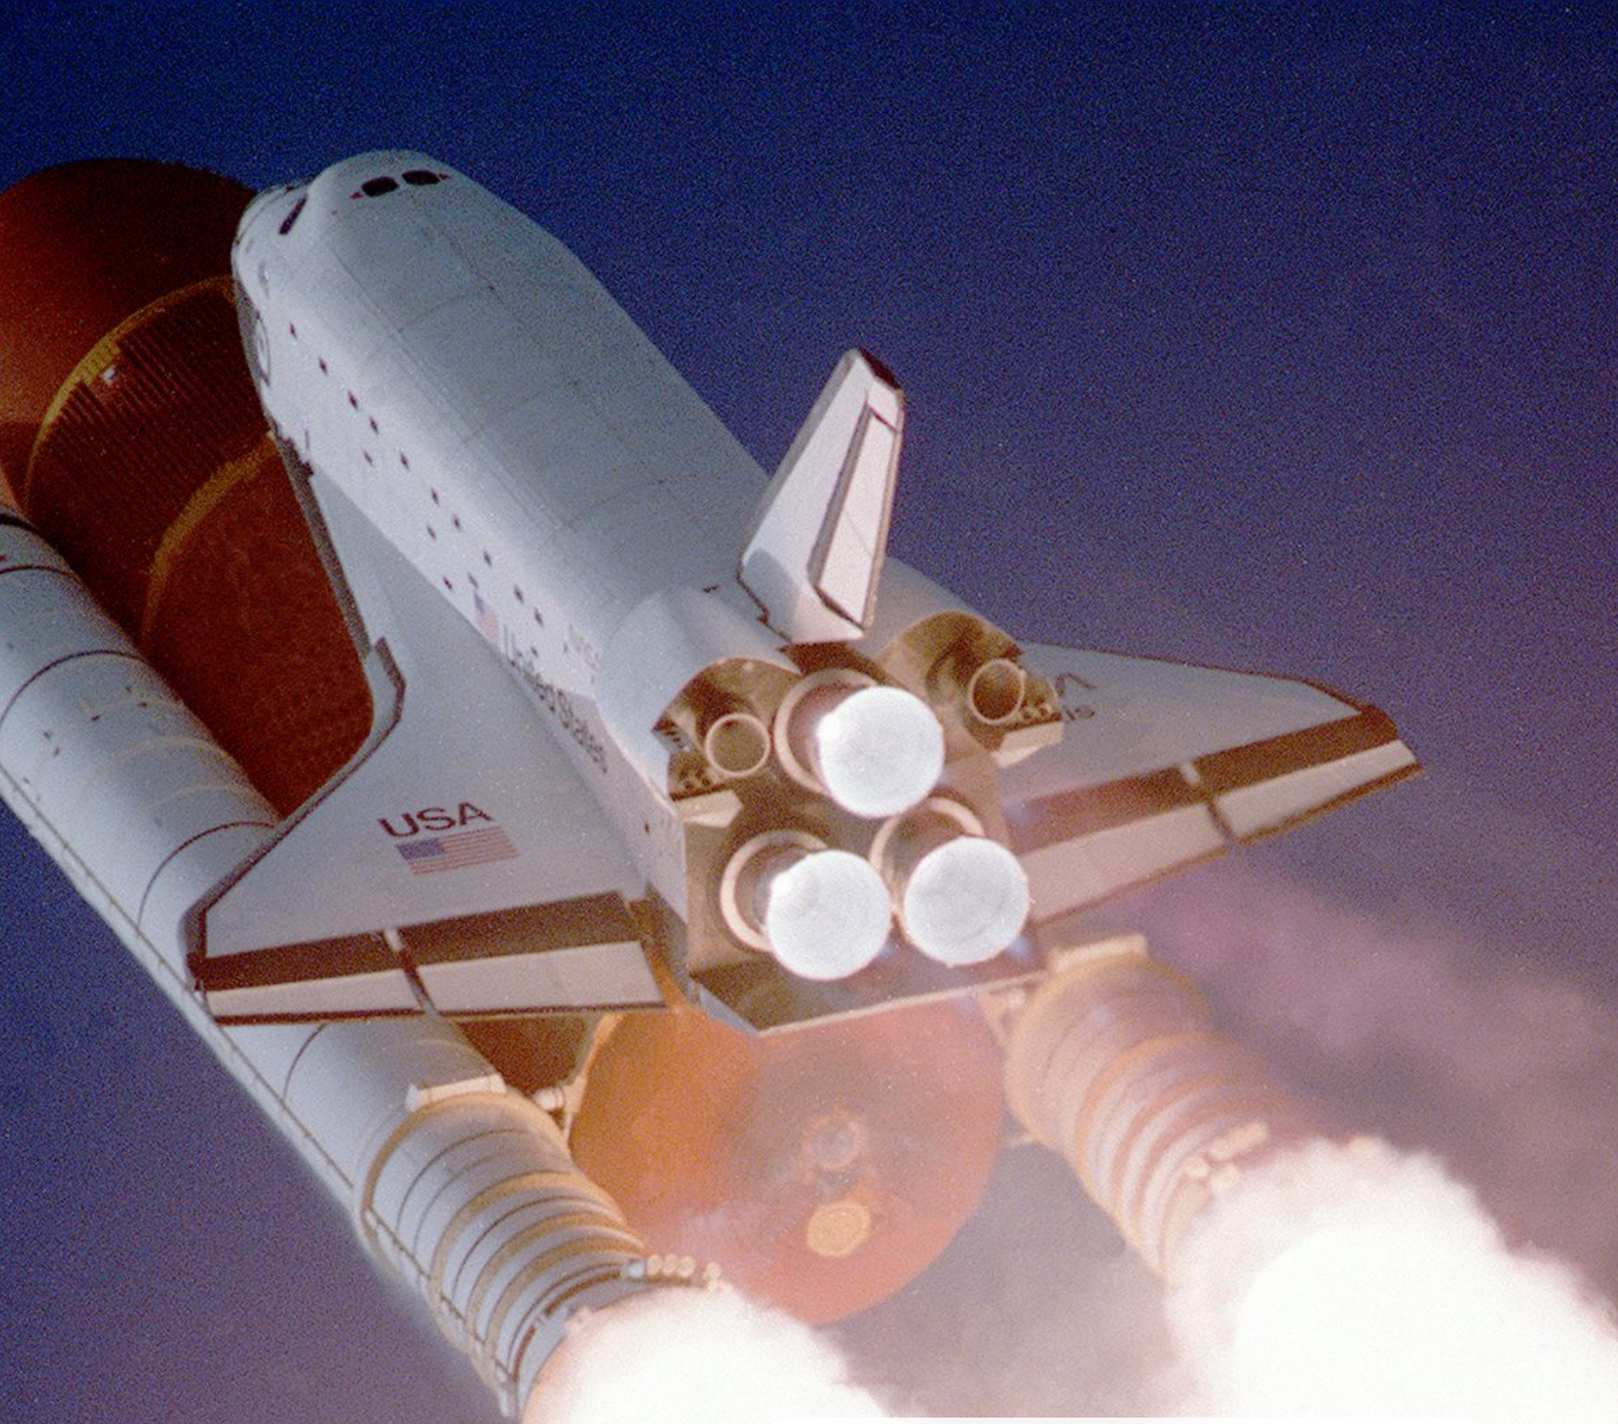

OP-103 · STS-41-B, 1984

UNTETHERED

In February 1984 Bruce McCandless flew a hundred metres away from the Space Shuttle Challenger with nothing holding him but a nitrogen-powered backpack. He was the first person to fly freely in orbit, and this is the photograph everyone remembers: one small white figure against the blue of the Earth and the black of space.

The original frame is square. We print it on a smooth, bright paper that keeps the blacks neutral and the snow-white suit crisp, and we leave a generous margin so it can be framed without a mount.

SIZE	PAPER	PRICE
30 × 30 cm	Smooth rag 300 g	**€46**
50 × 50 cm	Smooth rag 300 g	**€82**
70 × 70 cm	Smooth rag 300 g	**€129**

OP-104 · STS-27, 1988

CLIMB OUT

Seconds after lift-off in December 1988, a long-range tracking camera caught Atlantis climbing on the flames of its two boosters, close enough to read the flag on its wing. A landscape print for long walls.

SIZE	PAPER	PRICE
45 × 30 cm	Cotton rag 310 g	**€52**
90 × 60 cm	Cotton rag 310 g	**€118**
120 × 80 cm	Baryta 325 g	**€196**

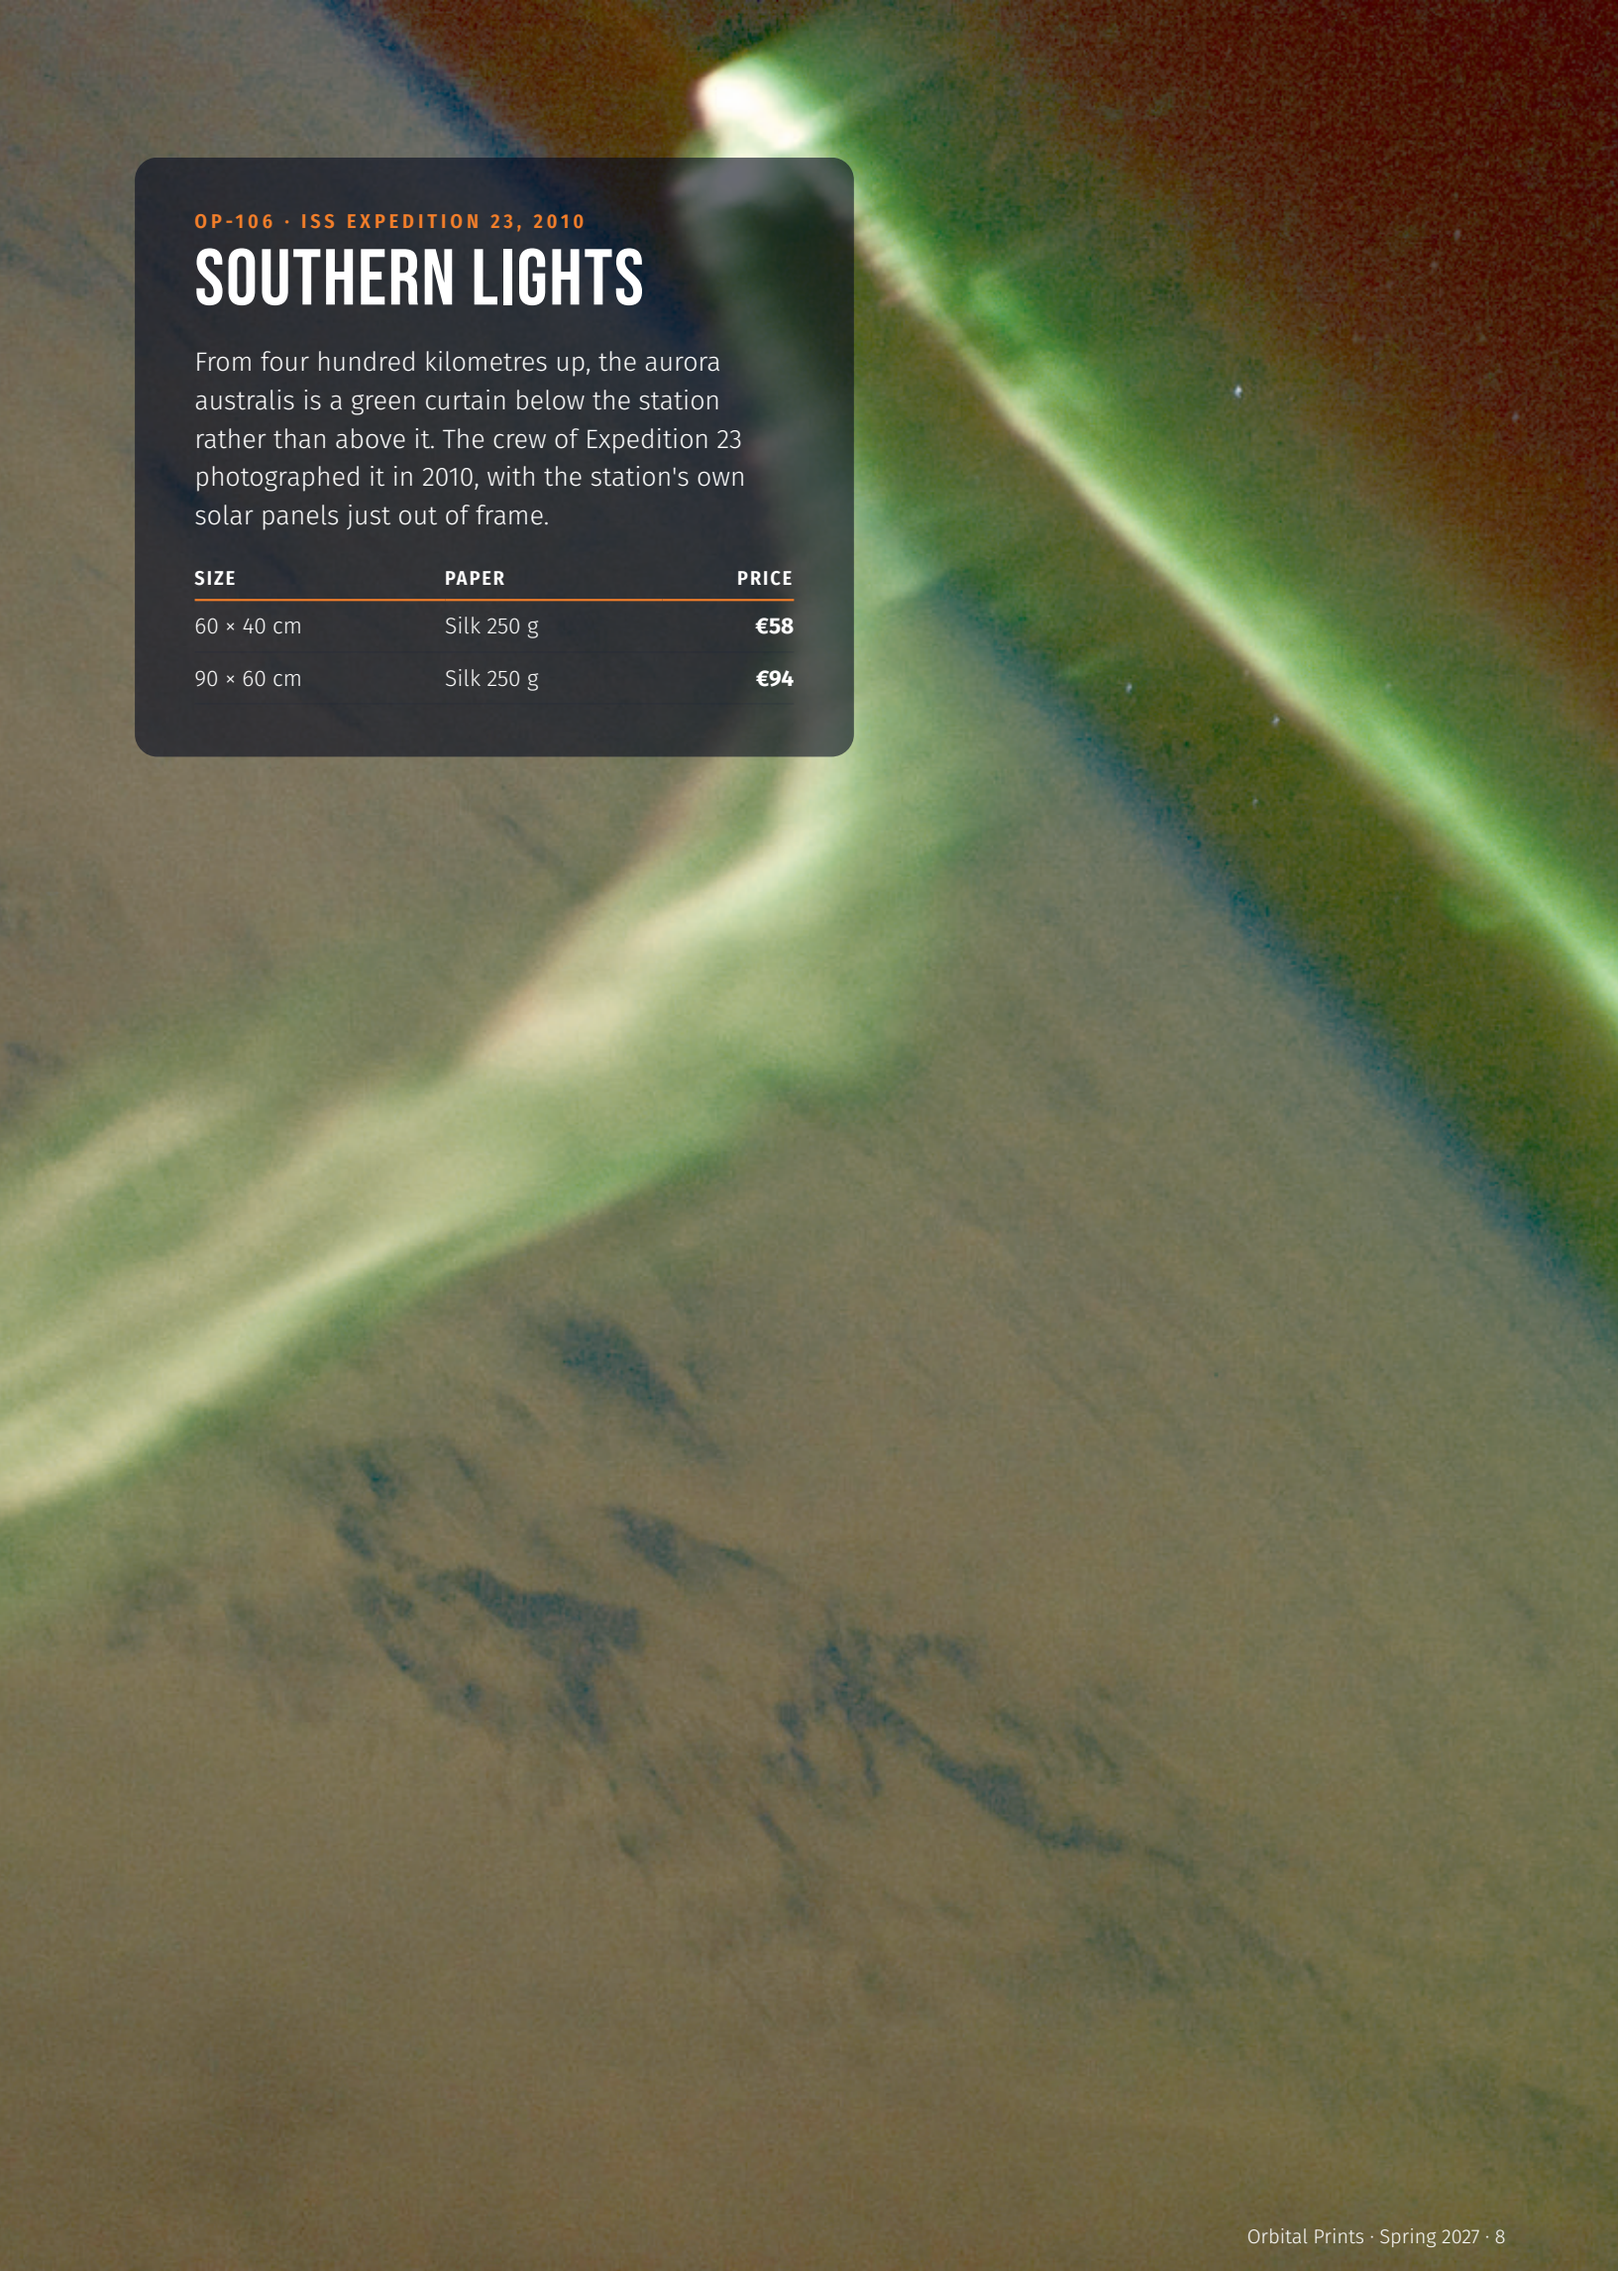

PRESS EDITION

OP-105 · STS-1, 1981 · PRINTED IN CMYK

FIRST LIGHT

The first Space Shuttle launch: Columbia rises from pad 39A with its external tank still painted white, a detail that lasted only two flights. This file is separated for four-colour printing, so the flame is rendered with the press's own oranges.

SIZE	PAPER	PRICE
40 × 40 cm	Silk 250 g	**€39**
60 × 60 cm	Silk 250 g	**€69**

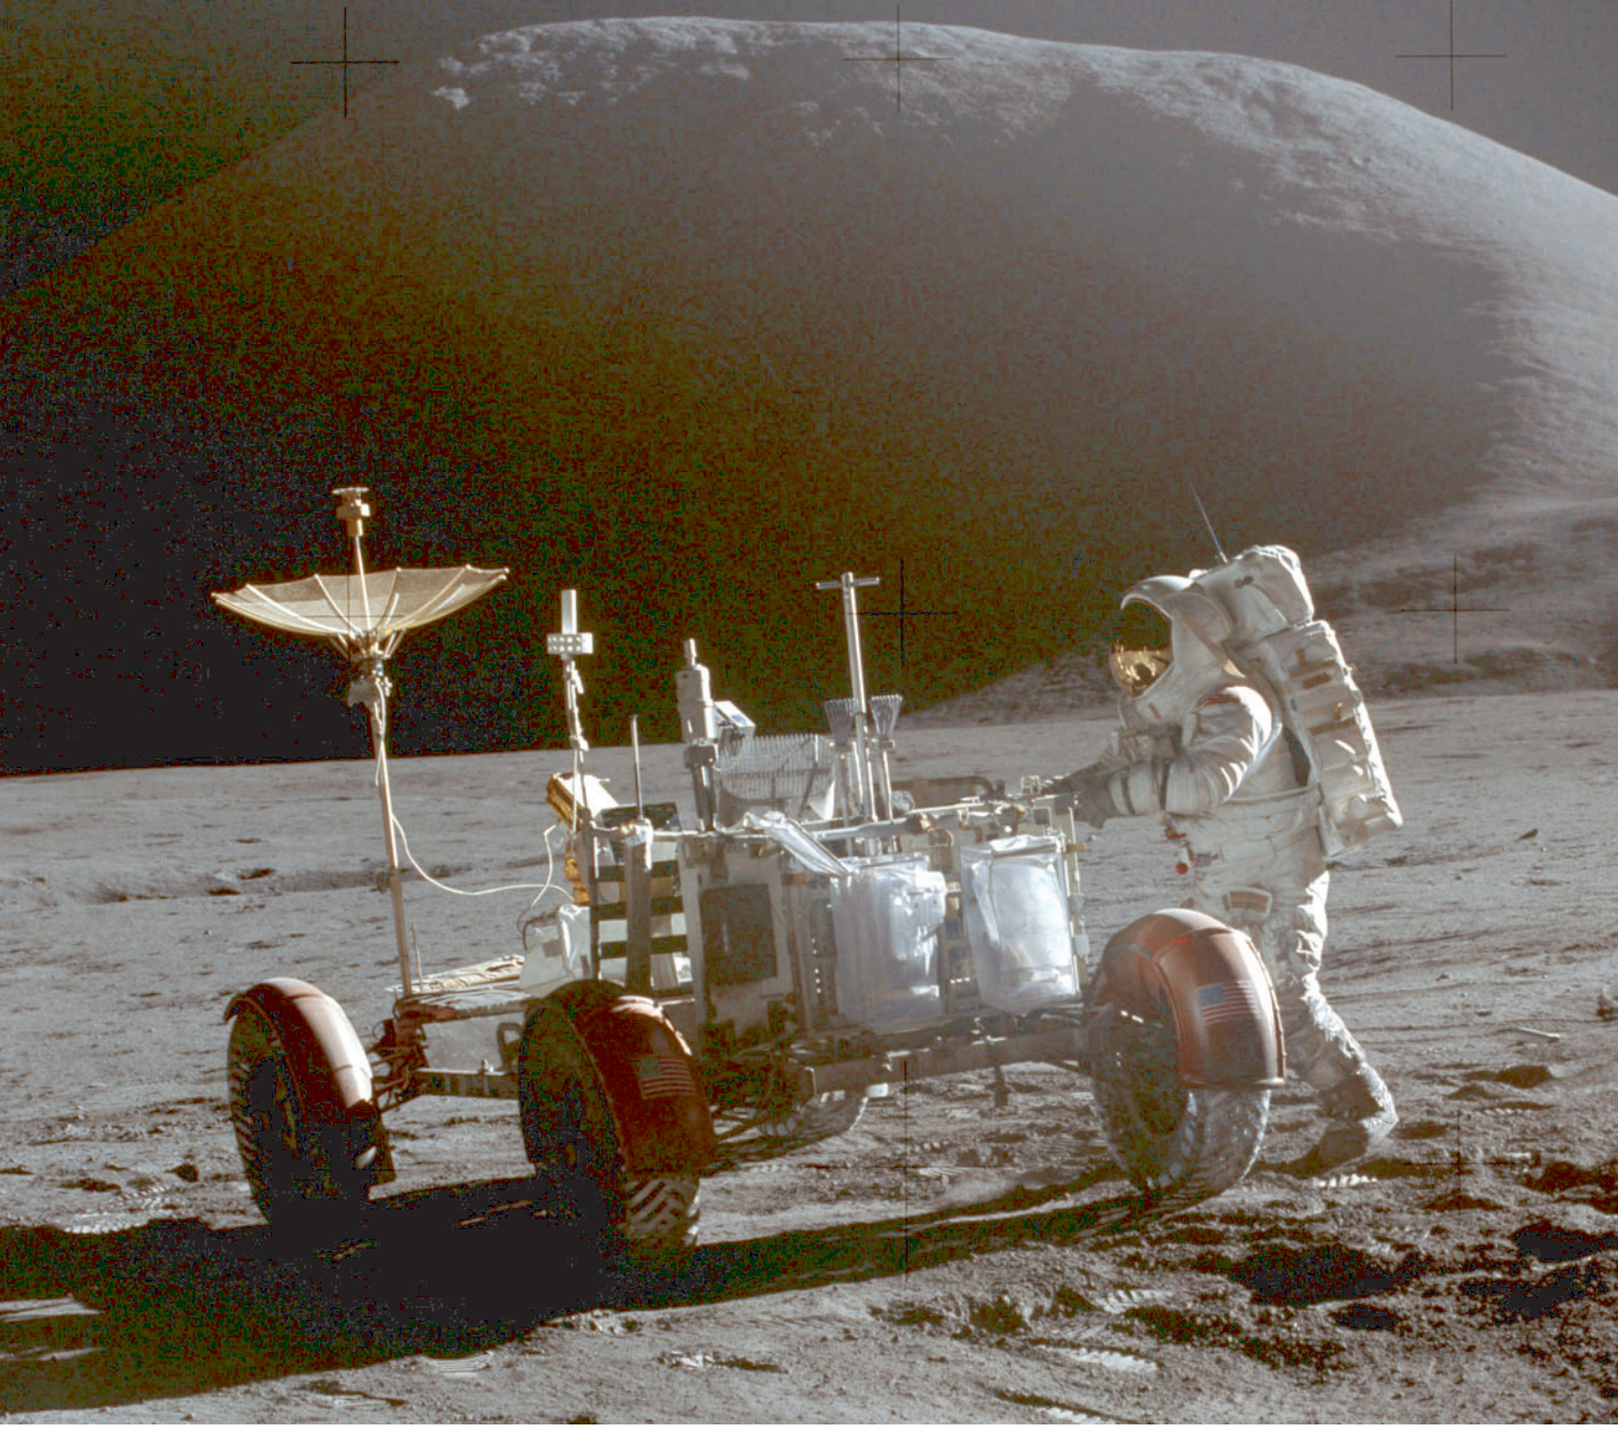

OP-106 · ISS EXPEDITION 23, 2010

SOUTHERN LIGHTS

From four hundred kilometres up, the aurora australis is a green curtain below the station rather than above it. The crew of Expedition 23 photographed it in 2010, with the station's own solar panels just out of frame.

SIZE	PAPER	PRICE
60 × 40 cm	Silk 250 g	**€58**
90 × 60 cm	Silk 250 g	**€94**

OP-107 · APOLLO 15, 1971 · PRINTED IN CMYK

HADLEY RILLE

Apollo 15 was the first mission to take a car to the Moon. Dave Scott photographed Jim Irwin working beside the Lunar Roving Vehicle, with Mount Hadley behind them, its slopes lit by a sun low over the horizon.

The original frame is small, so we offer it only up to 50 cm wide, where it still holds every footprint in the dust. Like First Light, it is separated for the press and printed on silk paper.

SIZE	PAPER	PRICE
30 × 22 cm	Silk 250 g	**€29**
50 × 37 cm	Silk 250 g	**€49**

SMALL PRINTS

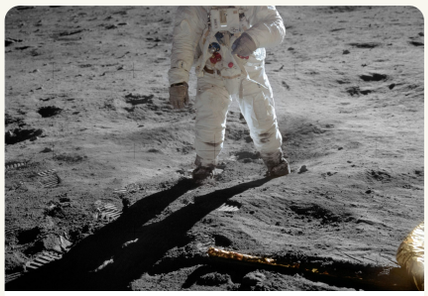

Every photograph in the catalogue is also available as a 15 × 15 cm or 15 × 20 cm print on the same papers, unframed, in a card sleeve. Order any five and the sixth is free.

BLUE MARBLE — €14
Apollo 17, 1972

EARTHRISE — €14
Apollo 8, 1968

TRANQUILITY BASE — €14
Apollo 11, 1969

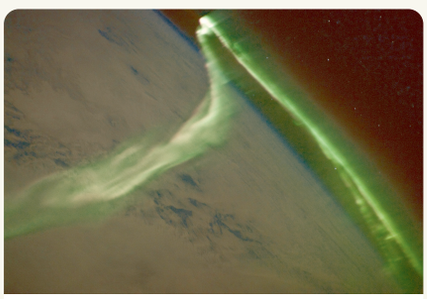

UNTETHERED — €14
STS-41-B, 1984

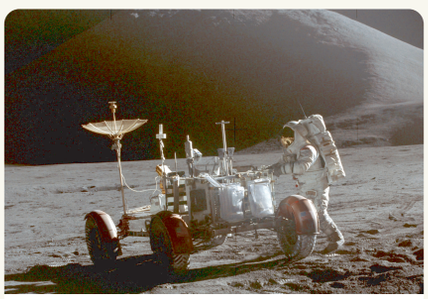

CLIMB OUT — €16
STS-27, 1988

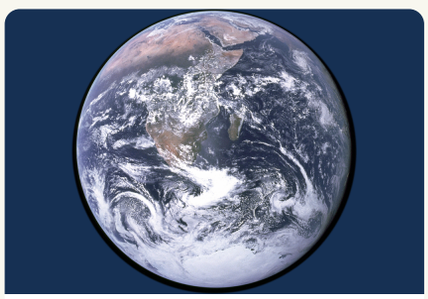

FIRST LIGHT — €12
STS-1, 1981 · **Sold out**

SOUTHERN LIGHTS — €12
ISS, 2010

HADLEY RILLE — €12
Apollo 15, 1971

STICKER SHEET — €18
Twelve vinyl stickers

FRAMES AND ORDERING

Each frame is cut from solid wood in our workshop and glazed with UV-filtering acrylic, which is lighter than glass and safe to post. Choose a finish:

Walnut · Oak · Black · White

Frames cost 40% of the print price and add five working days to delivery. Unframed prints leave the workshop within three days, rolled in a tube.

Order online, by phone, or with the card inside this catalogue. We answer every message ourselves.

Orbital Prints · 14 Bakery Lane · an invented address for a sample document
All photographs: NASA, public domain. Text and design: the Broadside project.
